

# **Sundance Louvered Roof**

## **Customer Operating Instructions**

### **Motorized Operation:**

**Your new Sundance Louvered Roof is motorized and has been equipped and preset with factory limit switches. These settings will allow you to open and close your louvers to any position at the touch of a button, without the worry of opening or closing too far.**

**The system uses a remote control transmitter to operate the louvers. Pressing the up button will open the louvers, pressing down will close the louvers, and to stop the louvers in the desired position, simply press the stop (middle) button. If the louvers do not fully open or close, or once open the motor continues to run; STOP THE LOUVERS!!!! And call our hotline (1-801-991-0010).**

**Your hand held transmitter is battery operated and replacement batteries are available at most electronic retail stores.**
